Highway 29 (Sonoma Blvd.)

Paving Project

Beginning June 15, 2009 the California Department of Transportation (Caltrans) will start an asphalt paving project on Highway 29 (Sonoma Blvd.) that will impact area traffic. Work will be completed by October 2009, however; inclement weather could impact the projected completion date.

Construction will be Monday through Friday, mainly at night. Work will start nightly between 6 p.m. and 10 p.m. Start times will vary depending on location. All construction work will end on or before 6 a.m.

The project will place rubberized hot mix asphalt from the separation of Interstate 80/State Route 29 through the Solano/Napa County line; a distance of approximately 6 miles. There will also be some electrical and guard rail replacement work. Some streets in Vallejo will be periodically impacted by lane and intersection closures during the project. Construction area signs, flaggers and detour signs will be used to assist/direct vehicular and foot traffic through the area.

Pedestrians, motorists and bicyclists are advised to use caution when traveling through the construction area. Noise will be unavoidable in certain areas. However, it will be kept within approved construction noise levels.

We truly appreciate your understanding and patience during this construction and will diligently work to minimize impacts and traffic delays from this project. Caltrans has established a hotline for this project. The number is (**510) 286 -4531**.
