INSPECTIONS

There are three types of inspection services provided by the City of Vallejo:

- Building Inspections
- Engineering / Public Works Inspections
- Fire Inspections in conjunction with the Vallejo Fire Department

Building Inspections

Building Inspections include all projects that require a building, electrical, mechanical, or plumbing permit.

Building Inspections are performed Monday through Friday between the hours of 9:00 AM to 5:00 pm, excluding City holidays.

To schedule a Building Inspection, please call 648-4384 prior to 6 AM on the day you would like to have the inspection performed. This is an automated system. You will need a permit number and the 3 digit code for the desired inspection listed on the inspection card.

To obtain information regarding the approximate time of your inspection, please call 648-4374 between 8:30 and 9:00 A.M. the morning of the scheduled inspection.

Engineering / Public Works Inspections

Engineering/Public Works Inspections include all projects that are permitted in the City right-of-way including encroachment permits, street repairs, and City projects.

To schedule an Engineering/Public Works inspection, please call 649-3417 at least 24 hours before starting work. When calling, have the permit number, address, date work will be ready for inspection, either AM or PM time, and type of inspection requested.

Additional inspections may be required during the project and will be explained by the Public Works inspector. Inspections also need to be scheduled within 3 days of the completion of work.

Fire Inspections for All Multifamily & Non-Residential Projects

The Vallejo Fire Department performs all fire related inspections including but not limited to Fire Sprinklers, Underground Fire Services, Fire Alarms, Commercial Kitchen Hood and Duct systems, and FM200 systems. To schedule a Fire Inspection, please contact the Vallejo Fire Department at 648-4565 at least 48 hours in advance of your inspection.
