Variety Children's Charity of Northern California gives the Gift of Knowledge to our Club Kids. \$20,000 for Tech Program

This fall we were awarded a grant towards our Tech Program by the San Francisco based Variety Children's Charity of Northern California.

There can be little argument that to achieve success in the workplace today, and in the future, youth must master and effectively utilize technology. Learning technology skills is important not only for enrichment, but also for the opportunities that they provide.

Technology opens up a new world of information and education that assists the whole child in their personal development. Club Tech enhances learning and skill development in areas such as basic software skills, networking, movie production, robotics, game design, and staff training.

Without the tools to effectively use technology, both technical competency and information literacy are needed to fully exploit the potential of information technology. Computers and the Internet are more than data storage or communication devices. They are gateways to a seemingly limitless by complex array of information sources of varied uses and quality.

Our vision is to provide a world-class Club Experience that assures success is within reach of every young person who walks through our doors, with all members on track to graduate from high school with a plan for the future, demonstrating good character and citizenship, and living a healthy lifestyle. With the funds awarded by the Variety Children Charity, we will be able to reach out to our Club Kids to assist them in the future of technology.

GREAT FUTURES START HERE.
